

## **REMARKS**

As a preliminary matter, the office action mentions JP 7-56513, page 2 line 3 from bottom, JP 7-56506, page 3, line 8, and JP 7-56516, page 3, line 17. Applicants believe that some of these references are erroneously cited, and that the single common reference is JP 7-56516.

Claim 6 has been amended to overcome the outstanding § 112 rejection, without narrowing the scope of the claim. Withdrawal is requested.

Claims 6-7 and 9-10 stand rejected under § 103 on the basis of the admitted prior art (AAPA) and JP '513. Independent claim 6 has been amended to emphasize that the frame supporting the liquid crystal panel and the light source unit are different from a housing, to more clearly define over the prior art, in which the mechanism is attached to the housing, and respectfully traverse.

In Fig. 4 of JP '516, a shaft 33 of a tilt mechanism 13 is inserted in a hole 21a of a housing 21. A tubular casing 31 is pivotally mounted on the shaft 33 via a rubber member 32. The tubular casing 31 is attached to the stand 12. There is no member corresponding to the frame of the present invention.

For the foregoing reasons, applicants believe that this case is in condition for allowance, which is respectfully requested. The examiner should call applicants' attorney if an interview would expedite prosecution.

Respectfully submitted,

GREER, BURNS & CRAIN, LTD.
